PROJECTS

Taipei City Dashboard 2.0
Lead Developer / Project Manager
Apr. 2023 - Present

- Proposed and solely executed the plan to refactor and rewrite Taipei City Dashboard FE, completing development in just over a month.
- Optimized and open-sourced the platform, which was acclaimed as a key technology policy achievement for Taipei City and highlighted by the mayor in summits in Shanghai and Seoul upon release.
- Ensured code modularity, readability, and maintainability, while also writing a comprehensive 26-section bilingual documentation.
- Promoted the platform during Taipei Codefest 2023, engaging 250+ engineers and resulting in 30+ subsequent contributors.
- Co-developing the platform's BE with TUIC's systems engineer.

One Premium
Designer / Developer
Jul. 2022 - Dec. 2022

- Self-taught front-end development within 3 months, completing 500+ hours of coursework and 5+ projects.
- Developed ProntoMock, a rapid online mockup tool, as a final project.
